## DETAILED ACTION

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 2. Claims 1-29 are rejected under 35 U.S.C. § 102(e) as being anticipated by Wheeler, U.S. Patent No. 5,583,920 (hereinafter Wheeler).

Regarding claim 1, Wheeler discloses with respect to a communication from a caller to a subscriber's directory number where the communication has been terminated to a voice mail system serving the subscriber instead of the communication having been terminated to terminating equipment associated with the subscriber's directory number, a method for transferring the communication from the VMS so the VMS is no longer involved in the communication (columns 30-31), the method comprising:

## Response to Arguments

3. Applicant surprisingly argues that the IP of Wheeler is not functionally equivalent to the claimed VMS. Examiner respectfully disagrees. The IP disclosed by Wheeler reads on the claimed VMS because Wheeler discloses the IP performs voice messaging features (see abstract). Applicant also incorrectly alleges Wheeler fails to teach the claimed releasing limitation. Examiner respectfully disagrees. Wheeler teaches the SSP routes the call to the destination and tears down the prior call

connection between the caller and the IP (see columns 32-33). For this reason, Wheeler teaches the claimed releasing limitation. Applicant is strongly advised to amend the claims.
